

Rain or shine,
dry all the time.

SPACEMAKER™

BECOME A CERTIFIED INSTALLER

SPACEMAKER™

SpaceMaker Outdoor Flooring is a new standard in composite decking. The patented interlocking and water sealing design not only hides screws for aesthetic appearance, but provides a dry space underneath for extra living or storage without the extra step of a ceiling assembly. SpaceMaker truly combines innovation, practicality, and above all aesthetics to create a versatile twist on outdoor living your clients will appreciate.

GROW YOUR BUSINESS BY BECOMING A CERTIFIED INSTALLER!

MARKETING AND SALES SUPPORT

Every Certified Installer will receive installation and sales training to help understand the benefits of SpaceMaker starting from talking to homeowners to final installation. Homeowners will be directed a "Find a Pro" section on the SpaceMaker website where they can locate all participating Certified Installers. All Certified Installers will be given the necessary sales tools and training.

SWAT PROGRAM

Being a certified installer you are automatically enrolled in our "Special Weapons And Tactics for SpaceMaker Installations". As installers you are on the front line for many different and unique installations. We want to reward craftsmanship. Simply send a description and picture of your unique SpaceMaker installation for a chance at a \$500 reward and be featured on the SpaceMaker "Hall of Fame".

PARTNERING WITH SPACEMAKER™

The success of SpaceMaker is dependent upon the success of the Certified Installers. As a manufacturer, SpaceMaker's job is to provide the Certified Installers with more than just an innovative product, but to communicate those innovations to homeowners. SpaceMaker's Certified Installers are treated as true partners. Many programs are available to not just reward Certified Installers, but to help grow their business.

Admiral™ ... The “Outdoor Flooring” Company

ENGINEERED, PATENTED & QUALITY-TESTED

Over a Decade of Manufacturing Experience

The Admiral™ facility has been producing environmentally friendly composite building products for over a decade.

Strong Capacity with Basic Vertical Integration means Consistently High Quality

Our factory is one of the largest in the world with over 90 production lines.

We process our own plastic and create our core materials, so there is no chance for variance in our SpaceMaker™ product's quality due to some supply issues.

Other factories buy inferior raw materials like wood dust & chips from sources with varying quality. This process does not assure that their products have consistent quality.

Admiral's™ SpaceMaker™ Partners with Technologically Advanced Suppliers

Cap-Coating materials and performance additives are sourced from America's best suppliers and tested on every lot to assure that only the highest quality items are produced and shipped by Admiral™ for its SpaceMaker™ product line.

Admiral's™ People

Admiral's™ Senior Management has decades of experience in the building material industry. We've seen it all and our knowledge and skills are built into every product we make.

Admiral's™ innovative designs, along with the highest quality materials and manufacturing processes enable Admiral™ to offer premier solutions to the problems faced by consumers today.

Admiral's™ Mission

Deliver only the very highest quality products in the industry with exciting and innovative features that provide added value for distributors, builders and consumers.

Just put any one of Admiral's™ products into your hands, you will immediately feel “The Admiral™ Difference”. We are very proud of our products. They are designed for those that simply demand the best.

In fair weather, the traditional and lasting beauty of Admiral's™ products shine...

But when the strong storms rage, you can rest assured that the high quality, superior strength and unique features of Admiral's™ fleet of products will be there to protect and defend your property.
